Maureen and Kelcey,

I met with Henry today to discuss the two Carpenter Snow Creek items and Barker-Hughesville. After further review of the available information, it appears we have collected all the information Henry was seeking related to the \$25k Carpenter Snow Creek OU1 PRP search. Therefore, we will not need to fund a new task order at this time.

Regarding the Carpenter Snow Creek ATP \$5k item below, Henry wants to push this to next year so that request for funding is also being removed from the list below.

The final item related to Henry's sites is the Barker-Hughesville 104e support \$40k. Henry thinks we will be ready for Toeroek to assist around January 2016. Remind me, is that something we can fund now and have them begin work on it in January? The SOW would be something like review and evaluate 9 104e responses and provide a letter report. There might be more tasks.

Thanks,

David Sturn

Subject: Enforcement extramural budget - TIME TO FUND YOUR WORK

To all ESs:

Here is the key to the chart

Orange = funded

Blue = NEEDS TO BE FUNDED (CFAF needs it's color changed)

(Scott, will you confirm that the Park City Source area is a duplicate of the Richardson Flat request? – Thanks)

Please get your PRs in ASAP. We have a fair amount of money – as in, we can fund all of these requests and still have about \$300K that we can use to fund more – I urge you to think broadly in funding the work you need done, or think you might need done, for the next 6 months. You know how the budget goes – don't expect to see a lot of money 1st quarter
